**AS A WORKMATE OWNER YOU GET
A 20% REDUCTION WHEN YOU BUY A TOOLMATE**

Dear Workmate Owner,

We hope that you are deriving great pleasure and practical advantages from your new Workmate and if you have found a particularly interesting new use for your Workmate, we would always be delighted to hear from you so that we can pass the tip on to other users.

Now we want to start another revolution in your workshop and as a Workmate owner, you save £2! Don't you sometimes wish there was something you could do about keeping your tools in order and making them easy to carry to any job in the workshop, in the home or outside it? If these have been your sentiments, then we have great news for you.

THE TOOLMATE is the ideal tool cabinet, tool box and tool carrying tray combined: The front tray opens to reveal all your tools and make them easily

accessible. A foam padded top adjusts itself to their shape and size and keeps them from moving about and damaging each other. You no longer have to fit each tool, time consumingly into its own little place. You just lay them out tidily next to each other, press down the foam padded top and secure it with nylon lugs. The nylon shelves are designed to accept large flat tools like saws and cramps. The main box is intended to accept bulky objects like planes, vices, mallets and your electric drill.

CARRIED IN YOUR HAND OR HANG IT ON THE WALL. The Toolmate is cleverly designed to hang on the wall simply from two hooks which are supplied and you can lift it off easily to carry it, well balanced in one hand. The front tray closes and may be locked for security. It is also instantly detachable and simply carried as a tool tray.

So, you see, the Toolmate is really three things in one: a tool cabinet to hang on your wall, a tool box which enables you to take your whole range of tools anywhere and a tool tray to carry a selection of tools to a particular job.

GOOD TO LOOK AT. We supply the Toolmate with a coat of cellulose sealer which looks attractive in itself. But if you wish, you can apply a coat of colour to make it match your own decorations. In this way, the Toolmate will look good in your kitchen or utility room. There is no need to banish such a handsome thing to the workshop or garage. Like your Workmate, the Toolmate was designed by practical people who understand the needs of the handyman - professional or amateur. Like your Workmate, the Toolmate will go with you anywhere making your job easier, your tools more accessible and keeping your home and workshop tidy, taking up the minimum of room.

REASONABLY PRICED - AND YOU SAVE £2. The price of your Toolmate is £9.70 fully assembled in whitewood, complete with wall hooks and plugs, two nylon shelves and dowel fittings and with two keys for your lock. But as a Workmate owner, you pay only £7.70. A saving of more than 20%. The Toolmate is guaranteed against defective workmanship and materials for five years. Here is a convenient order form which also gives details about extended payments. We feel sure that you will be delighted when you buy a Toolmate. But please order now, the special £2 discount offer is only available for a limited time.

Yours sincerely,

D.J.C. Bernard,
Director & General Manager.

Use this convenient form to order your Toolmate now.

To: Mate Tools Limited, Brewery Road, Hoddesdon, Hertfordshire.
