

Black & Decker

WM120 TYPE 1 WORKMATE METAL VICE CLADDINGS

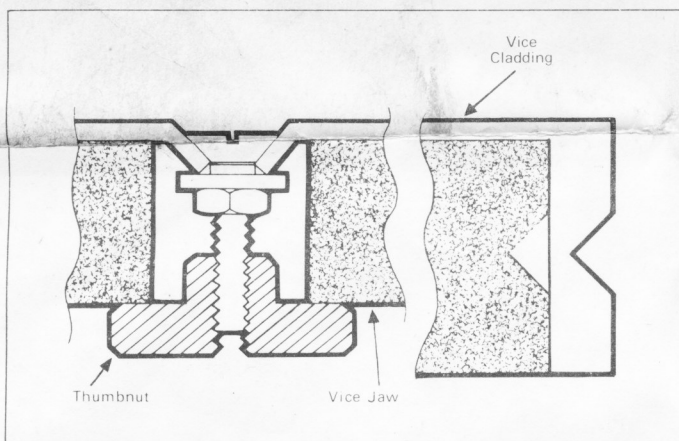

Your new WM120 Metal Vice claddings are one of a series of attachments designed specifically for use with your Black & Decker Workmate.

They provide a metal working type surface which protects the wooden vice jaws from mechanical damage, dirt, oil, etc.

INSTRUCTIONS FOR USE

Assembly

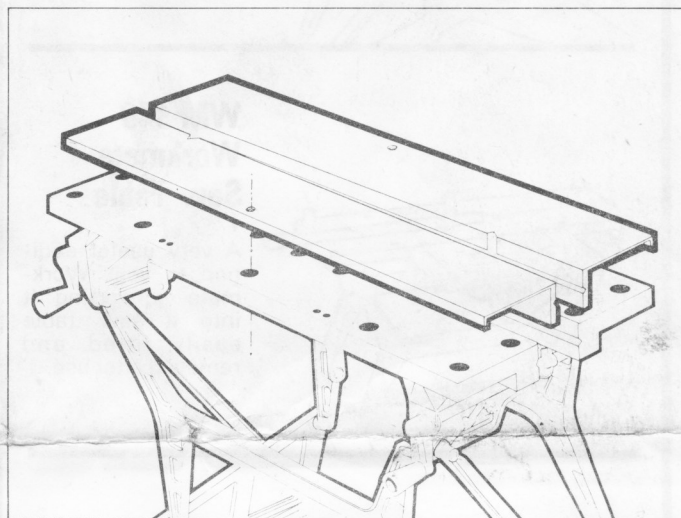

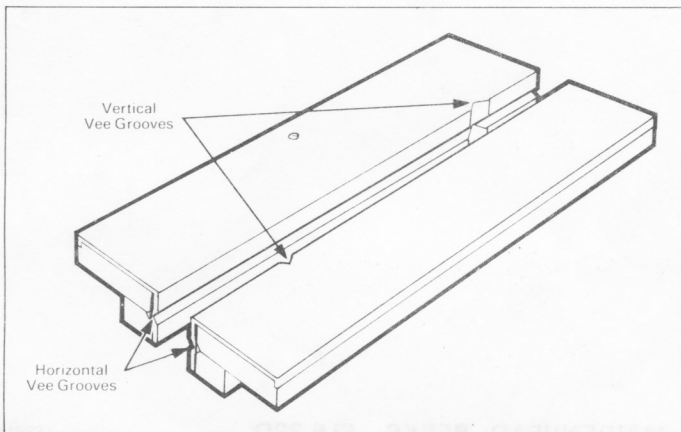

Unscrew the thumbnuts from the assembled vice claddings and place claddings over Workmate vice jaws ensuring that the screws enter the appropriate vice peg holes.

Fit thumbnut and finger tighten. Take care not to over tighten especially when saw table mounting bracket is fitted.

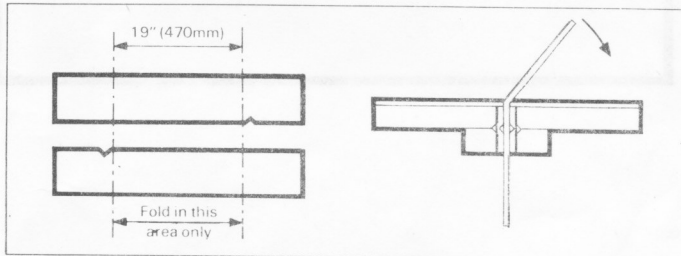

Holding Round Workpieces

Circular objects can be held either horizontally or vertically in the vee grooves provided.

Folding Sheet Metal

1. Light sheet metal, up to 19" (470mm) wide may be held for folding as shown.
2. Maximum bending capacity is:
Sheet aluminium 16 SWG = 0.064" = 1.6mm
Mild steel 20 SWG = 0.036" = 0.9mm
If fold is over 12" (300mm) long these thicknesses must be proportionally reduced.

Note

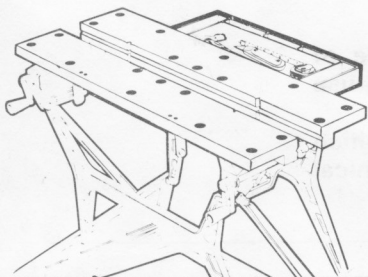

The WM120 is not suitable for use with WM125.

Service

There is a national network of 23 service branches where you can send or bring any Black & Decker tool for repair or servicing. Each is staffed by a team of skilled craftsmen led by factory trained managers. These are backed up by 600 service collection centres which are listed in the Yellow Pages.

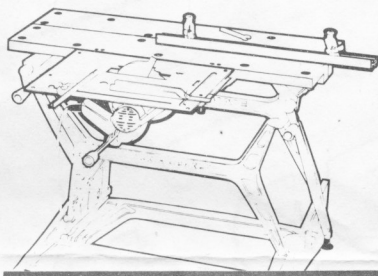

Other Workmate Attachments

A range of Workmate attachments are now available to give even more versatility to this unique workbench. Ask your dealer today for more details of the range including:-

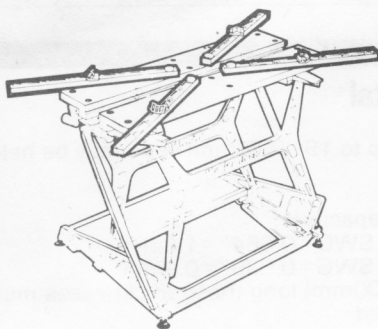

WM 130 Workmate Tooltray

Specially designed for fitting easily to the rear of the Workmate Vice Bar and capable of holding a wide range of tools.

WM 140 Workmate Saw Table

A very useful addition to your Workmate converting it into a saw table easily fitted and removed after use.

WM 110 Workmate Universal Extender Arms

These easily fitted arms make the Workmate ideal for clamping large or small objects in a variety of sizes.
